PROFILE SUMMARY

Computer Science Engineering student with an 8.14 CGPA and hands-on experience in software development, Python, SQL, databases, and data-driven problem solving. Skilled in analyzing data, developing technology solutions, and collaborating with technical teams to solve complex problems. Seeking to apply analytical, technical, and communication skills as an Associate Business Analyst while contributing to data analytics, reporting, automation, and business problem-solving initiatives.

EDUCATION

Presidency University

Bachelor of Technology in Computer Science and Engineering, CGPA: 8.14/10.0

Bengaluru, Karnataka

Jan 2023 – Aug 2027

Sri Vidyaniketan PU College

Pre-University Education (PCMB), Percentage:90%

Gangavathi, Karnataka

Mar 2021-Mar 2023

SKILLS

PROGRAMMING: Python, SQL, Java, HTML, CSS

DATA & ANALYTICS: Data Analytics, Data Science, Tableau, Excel

DATABASES & TOOLS : MySQL, NoSQL, DBMS, Git, GitHub, AWS

BUSINESS & PRODUCTIVITY: PowerPoint, Word, Microsoft 365, Power Apps, Power Automate, SharePoint Online

CORE SKILLS: Analytical Problem Solving, Communication, Collaboration

EXPERIENCE

Software Developer Intern | Bharat Electronics Limited (BEL) [Certified](#)

Jul 2026 – Aug 2026

- **Analyzed** application workflows and database-driven processes to identify issues and improve performance.
- **Collaborated** with engineering teams throughout the SDLC to understand requirements, analyze issues, and support solution delivery
- **Documented** technical workflows and solutions to support effective communication, process improvement, and solution delivery.

PROJECTS

CareerBridge [Demo](#) | AI + Analytics

Developed an AI-powered career platform for skill-gap analysis, ATS resume evaluation, personalized career recommendations, scholarship discovery, learning roadmaps, and interview preparation.

SentinelX AI [Demo](#) | AI + Product

Developed an AI-powered security operations platform for security monitoring, threat detection, and incident response, with an interactive web-based interface.

Smart Robotics and IoT Automation Platform [Demo](#) | IoT + Automation

Built an IoT robotics platform integrating ESP32, sensors, Robo Car, and Robo Dog for automated control.

Implemented sensor-driven automation and real-time device control.

CERTIFICATIONS & ACHIEVEMENTS

- Deloitte Australia Data Analytics Job Simulation – Forage [certification](#)
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate [certification](#)
- Unlocking Open Source with GitHub – GDG on Campus, Presidency University [certification](#)
- Top 10 Finalist Team – Crack-A-Thon 2026, GDG On Campus Presidency University [certification](#)
